

Classical

Mesenchymal

Proneural

Neural

CREB Signaling in Neurons

Hepatic Fibrosis /
Hepatic Stellate Cell
Activation

Wnt/ β -catenin Signaling

nNOS Signaling in
Skeletal Muscle Cells

Corticotropin Releasing
Hormone Signaling

Coagulation System

Molecular Mechanisms
of Cancer

cAMP-mediated
signaling

G Beta Gamma
Signaling

IL-10 Signaling

Cyclins and Cell Cycle
Regulation

Protein Kinase A
Signaling

PI3K Signaling in B
Lymphocytes

Integrin Signaling

Cell Cycle: G1/S
Checkpoint Regulation

Synaptic Long Term
Potentiation

Fatty Acid Activation

VDR/RXR Activation

TNFR1 Signaling

Estrogen Receptor
Signaling

Glioblastoma Multiforme
Signaling

Natural Killer Cell
Signaling

Semaphorin Signaling in
Neurons

Cardiac β -adrenergic
Signaling

Mitochondrial L-carnitine
Shuttle Pathway

Actin Nucleation by
ARP-WASP Complex

Colorectal Cancer
Metastasis Signaling

Granzyme B Signaling

Colorectal Cancer
Metastasis Signaling

IL-6 Signaling

CCR3 Signaling in
Eosinophils

Aryl Hydrocarbon
Receptor Signaling

Tec Kinase Signaling

PTEN Signaling

RhoGDI Signaling

G-Protein Coupled
Receptor Signaling

Axonal Guidance
Signaling

Leukocyte Extravasation
Signaling

Regulation of the
Epithelial-Mesenchymal
Transition Pathway

Unfolded protein
response
